MADE IN USA

In 2009 Still The World's Loudest Safety Whistle!!

Performance In Any Weather Or Safety Situation

Blown and heard on land, up to 1/2 mile, and even underwater, up to 50 ft. A non-corroding thermoplastic housing is easy to grasp, and the patented double chamber design allows it to be blown when held right side up or upside down.

Both whistles are used by Police Departments, the U.S. Military, U.S. Coastguard, and Emergency and Diving Operations who appreciate their all-weather use: each whistle purges moisture yet still delivers a loud, penetrating sound easily heard in any environment.
